

## Assignment #2 (Retail Store)

ABC Retail store is currently a special discount based on the total receipt value.

- 10% Discount if the total amount is in between 100 to 199.99
- 15% Discount if the total amount is in between 200 to 299.99
- 20% Discount if the total amount is in between 300 to 499.99
- 25% Discount for amount 500 and above

The python program should prompt the user to enter the price and ask for quantity. The program must continue to prompt the user if he/she wants to enter another item.

Prompt the user to enter another item & quantity as long as they want to enter items.

When entered no, it should stop prompting and display the report.

Here is the expected output: (Sample Output)

```
*****
